

Feature & Description

The BGI139 is a ready to use stand-alone desktop manual equipment. This equipment laminates hotmelt tape on reels of chips.

Lamination pressor can be changed in few minutes to swap from one dimension to another.

- Manual unrolling of the reel
- Manual positioning of the reel under the lamination tool
- Step by step indexing by pins
- Pressor in brass
- Lamination system for standard 35 mm width reels
- Equipment supplied with 1 set of lamination pressor
- Pressor dimensions: 11.8x13mm, 10.8x13mm, 8.32x11mm, others...
- Hotmelt laminating equipment for memory, microprocessor...

Advantages

- Used for low runs, prototypes, lab process tests, material validation ...
- Throughput of up to 3000 units per hour
- Compact and easy to use
- Used for contact chip lamination (2 modules front), specific chip shapes...

Description

- Width: 410mm
- Depth: 300mm
- Height: 350mm
- Weight: 15kg

Throughput

- Up to 3000 units/hour

Facilities

- Power: 100-240V AC
- Frequency: 50-60Hz single phase
- Power consumption: 250W maximum
- Pneumatic characteristics: 6 bars

Environmental conditions

- Operating temperature: +10°C to +40°C
